RWO Civil Structures Geoenvironmental

Commercial

RWO specialises in providing core value, civil, structural and geoenvironmental engineering services and solutions across all sectors - from residential and retail to commercial and industrial, we have the experience and technical capabilities to deliver your project from feasibility through initial design and development work to completion and final handover.

Deploying the latest engineering skills and processes together with advanced Building Information Modelling (BIM) technologies, our services include ground investigation and geophysical surveying, pre and master planning and development work and civil and structural engineering design.

Harrogate 47 site for Opus Land - Opus Land's Harrogate 47 scheme is part of a long-term investment project seen as critical for Harrogate and the wider North Yorkshire economy. We provided civil and structural engineering services for two commercial units, totalling 110,000 sq. ft. of quality industrial space. Site wide earthworks and infrastructure design and structural engineering work and further engineering work were part of an extensive package of support delivered by RWO.

AMP, Yorkshire - Support around a new phase of development at a state-of-the-art manufacturing centre on the 150-acre Advanced Manufacturing Park in South Yorkshire involved civil and structural engineering services from RWO to support the build of 93,000 sq. ft. of office and industrial workspace. A key feature of our plans involved the design and construction to the highest BREAM environmental and sustainability standards.

Century Business Centre, Yorkshire - Working in partnership with design and build contractor Esh Construction and architects The Harris Partnership, we provided detailed building information modelling (BIM) techniques to deliver the highest levels of energy efficiency and sustainability for a new business incubation hub. Our engineering design experience and technical capabilities to deliver the project to the highest standards of quality and on time was a key advantage for the client.
