RWO Civil Structures Geoenvironmental

Social

RWO specialises in providing core value, civil, structural and geoenvironmental engineering services and solutions across all sectors - from residential and retail to commercial and industrial, we have the experience and technical capabilities to deliver your project from feasibility through initial design and development work to completion and final handover.

Deploying the latest engineering skills and processes together with advanced Building Information Modelling (BIM) technologies, our services include ground investigation and geophysical surveying, pre and master planning and development work and civil and structural engineering design.

Albany Park, County Durham - Karbon Homes' mix of 76 new homes has been developed on land at Albany Park, Washington. The scope of work has seen RWO provide planning, flood risk analysis, design expertise and local authority sewage adoption agreements, partnering with Karbon Homes' in-house team to ensure the project is being delivered on time and to the highest standards.

Spennymoor, County Durham - Housing association Livin Housing has developed 39 two-bedroom bungalows for affordable rent in Spennymoor. Our expertise and sector experience was again pivotal in bringing forward this development successfully with a package of civil and structural design services.

Pelton, County Durham - RWO are supporting Karbon Homes in this multi-million- pound development of new homes in County Durham.

Civil and Structural design services are again at the centre of this development of 104 affordable homes on the site of the former Roseberry Sports Community College in Pelton.

Hailed as a welcome boost for local housing stock the site also includes 53 rent to buy properties, 31 apartments and 8 bungalows for the over 50's.
