BACKGROUND

Engineering excellence

In today's world, we are all looking for growth; it's as important as ever. Yet the path to success is not always a clear one. We recognise this, helping our clients to see the way forward with flexible civil, structural and geoenvironmental engineering services, adept skills and expert knowledge you can always rely on. From ground investigation and geophysical surveying, and pre and master planning work through detailed design and development work to modern engineering management and business critical oversight, we will work with you every step of the way to ensure success from concept to project completion.

Eschewing the norm, we bring an uninhibited commitment to client service, quality and innovative tailor-made solutions to our work.

We are passionate about what we do and who we work for, always adding value and maximising ROI.

Stephen Knight - Head of Building Services

"RWO has the skills and experience to deliver the highest standards of service and quality. "

RWO

SOCIAL VALUE

Improving communities through action

Engineering a brighter future
Good design is paramount in engineering, creating the places where people want to live and work. It extends to the wider environment and infrastructure that surrounds and envelops us all - from the fundamental layout of streets and pavements to the provision of useful local facilities and community services.

Through effective design in engineering, RWO generates increased value throughout the entire development process, differentiating the perfunctory from the exceptional. Simply put, it helps to deliver more value and return on investment.

Sustainable Success
Sustainability lies at the heart of responsible civil and structural engineering. It shapes and influences the environment in which we live, for the benefit of everyone and delivering a better quality of life. It's why at RWO we had adopted a sustainable approach to client service.

Our engineers work to improve our quality of life, but in doing so we have a duty to future generations to minimise the impacts that our activities have upon the environment.

Jenna Strover - Head of Commercial Delivery Potter Space

"RWO ensures our developments are delivered on time as we continue to invest and expand to meet high demand for smaller industrial premises."

RWO

SERVICES

Designing for the future

With offices in Newcastle, Leeds, London and Stokesley, RWO has a national reach and capability, providing unparalleled civil, structural and geoenvironmental engineering services:

- **Pre-planning and feasibility engineering**
- **Highway design and development**
- **External works and SuDS (Sustainable Urban Drainage)**
- **Structural engineering**
- **Geoenvironmental engineering**
- **BIM**
- **Earthworks Design**

From AutoCAD civil 3D and Revit through Micro Drainage and TEDDS to Tekla and Microsoft Office, we utilise the very latest software and technology to support our design services and project fulfilment services. Quality is a hallmark: we are ISO9001 compliant with audits completed annually to ensure the highest standards of excellence.

Our competencies are broad, with experience in delivering major civil, structural and geoenvironmental engineering projects, including:

- **Warehouses**
- **Offices**
- **Hotels**
- **Industrial**
- **Retail**
- **Leisure facilities**
- **Residential**
- **Data centres**
- **Medical facilities and hospitals**
- **Care Homes**

CULTURE

Brilliant people: better ways to work

Any organisation is defined by the quality of its people; they are the foundations upon which service, trust and values are built. It's why RWO invests in the brightest and best - harnessing the skills, ambition and talent of our people for the benefit of clients.

Our projects are led by senior management supported by skilled teams of highly qualified and dedicated professionals, who excel in designing and delivering results oriented solutions. Our people are also fully qualified and members of professional bodies including the Institution of Civil Engineers and Institution of Structural Engineers.

We take the time to understand our clients' requirements, modus operandi and objectives. Bringing integrity, honesty and transparency to our work allows us to develop the mutually beneficial relationships that deliver results.

"RWO adds value to our operations with critical sector insight, experience and expertise in large scale engineering design work."

Rob Hudon - Commercial Director Peter Duffy Ltd.

STRUCTURE

A structure for success

Under the leadership of managing director Ross Oakley, RWO has built a capable and skilled team at its offices in Newcastle, Leeds, London and Stokesley to support planned strategic growth and an expanding national footprint. This is focused around a team of four company directors supported by associate directors and their teams, who can bring more than 100 years' of combined experience, expertise and management in civil, structural and geoenvironmental engineering.

Alan Cooper - Director Core Special Projects

"RWO have the skills and experience to deliver service and quality for this important project [Rockingham Logistics Hub], which will benefit so many in the local area."
